PROFESSIONAL STATEMENT

An enthusiastic customer service professional with a passion for learning new skills and effective teamwork. Driven by helping people to achieve their goals and encouraging repeat business. I take pride in delivering friendly, professional and reliable service to every customer. I have a people-first approach and can work well under pressure. I also have a background in IT, particularly software development and systems administration. Currently on the lookout for my next challenge, and to bring my skills and experience to your organisation.

KEY SKILLS AND STRENGTHS

Customer Service & Management

Twelve years face-to-face customer service experience in the hospitality industry. This includes encouraging repeat business by building a good rapport with customers, as well as suggestive selling. Resolving customer complaints and concerns. Managing shifts of up to ten people and delegating tasks.

Food Handling

Skilled in food preparation, ensuring all food hygiene standards are maintained. Making sure all food stock is properly rotated so that older food is used first, and that expiry dates and times are properly displayed. Can also make barista-level coffee, as well as service the coffee machine.

Technical and IT Proficiency

Two years development experience with JADE platform, including extensive testing, creating documentation and submitting code for peer review.

Industry experience in front-end web development using HTML, CSS and JavaScript to create responsive websites and web applications. This includes website planning, wireframing, development, testing and maintenance applying knowledge of web standards, accessibility standards and UX design.

Experience in data entry and data mapping, as I have previously been part of a project to integrate two CRM platforms. A strong understanding of data access and management - experience in both relational and NoSQL database management systems for security and management of data.

Expertise in systems administration - providing first line support for a range of applications and associated server platforms to ensure reliable performance. Monitoring servers, performing regular maintenance and updates. Managing user accounts, resetting passwords, onboarding and offboarding users. Handling queries and requests over email, phone, Teams and ticketing services. Responding to incidents in a timely manner, escalating when required. Ensuring environment backups run smoothly and performing test restores on a regular basis.

Relationship Management and Communications

I like to keep an open line of communication with team members and be available for support or assistance. I'm proactive in sharing knowledge, skills and information with other team members. I can communicate with my team at all stages of a project including giving regular progress updates and acting on feedback.

Graphic Design

I have extensive industry experience using the Adobe suite, primarily InDesign, Photoshop and Illustrator to create a wide range of digital and print collateral. I also have strong industry experience with pre-press, and preparing documents and other material for print, including non-paper-based products. I also have experience with brand design for small businesses based on the business goals and standards.

WORK EXPERIENCE

Jade Software Corporation

Developer | Aug 2022 – Nov 2024

Primarily responsible for maintaining the software used to monitor and maintain customer servers and environments using JADE. This included fixing bugs and implementing feature requests to ensure Jade can deliver their global managed services.

- Writing clean, easy to understand code including comments to ensure a high coding standard
- Analysing existing code to identify bugs, updating the code where required
- Extensive testing including manual testing and writing unit tests to cover all possible scenarios
- Writing extensive documentation including detailed design documents outlining precisely how the new feature will be implemented, as well as process documents with step-by-step instructions for the end-user
- Submitting code for peer review, discussion with the reviewer where best to make changes, and implementing them as required.

Systems Administrator | Apr – Aug 2022

Primarily responsible for being the first line support for JADE applications and associated server platforms. This includes performing application updates and patches, as well as creating and maintaining user accounts among other tasks.

- Monitor servers and perform tasks related to server upkeep and maintenance
- Contributing to the development of operational procedures
- Controlling user log-on and registration requirements, as well as password resets
- Responding to client queries and acting on requests over the phone, email, Teams and Tracker.

Business Systems Integrator | Jul 2021 - Jan 2022

Primarily responsible for the integration of Jade's two Customer Relationship Management platforms. This involved making sure both platforms had the required fields that data was up to date. The data also had to be accurate and of high quality.

- Setting up the integration of Hubspot and Dynamics, using data mapping to ensure data fields match and relevant data is entered
- Updating data fields and cleansing data to enable staff to efficiently view information
- Creating support documentation for other team members to create and update data between systems.

Freelance

Graphic Designer | Jan 2015 - Nov 2019

The role required meeting with clients to establish their needs and providing an estimate for the delivery of product to an agreed timeframe. Primarily working in print, I created a range of material and assisted clients with business rebranding.

- Creating a wide range of print collateral, such as books, business cards, signs, billboards and more
- Juggling multiple jobs at different stages of production simultaneously
- Knowledge of both Mac and PC operating systems
- Using Adobe CC to create print and web material from scratch to a high standard
- The ability to change and edit files based on client feedback
- Knowledge and understanding of recent design trends to apply them to my work.

Lead Designer | Sep 2017 - May 2018

Contracted as the primary in-house designer at Printable Solutions Ltd, I was responsible for managing and delivering client graphic design projects for the business which involved producing a range of digital and print material including logos, brand guidelines, brochures, business cards and posters.

- Working as the primary in-house designer to create a range of digital and print material including logos, brand specifications, brochures, business cards and posters

- Co-ordinating the delivery of customer requests with clients, managers and production staff to ensure projects were completed to the highest quality
- Performing pre-press tasks on documents before print production.

Christchurch City Council

Graphic Designer | May 2013 - Sep 2013

Filling in for a team member on maternity leave, my tasks included creating print collateral for various council departments and services. These included brochures, signs, process documents, reports and newspaper advertisements among others.

- Working as part of the in-house graphic design team to design and develop various print collateral
- Coordinating with the project manager and collaborating with team members to ensure goals are met
- Working under pressure to ensure projects were delivered on time and within budget.

Previous Roles

BP Connect Dallington | May 2009 - Aug 2014

McDonald's The Palms | Dec 2001 - Nov 2008

Prior to my work in design and IT, I held two positions in the hospitality sector, where I gained skills in customer service and food preparation. By the time I left McDonald's I was a shift manager, delegating tasks to the rest of the crew and ensuring there was a high level of communication between team members, so the shift runs smoothly.

- Interacting with customers on a day-to-day basis
- Responding to customer concerns
- Ensuring a high level of communication and teamwork
- Delegating tasks
- Preparing food whilst maintaining hygiene standards.
